Lesson plans project

December 12th, 2018

I did my lesson plan theme on fairy tales. I thought it would be fun to do because the kids would be excited and more interactive with both special needs and gen ed kids. The fairy tale theme would help them get interested to learn. Also, it would help them with their cognitive learning skills. The plan teaches the kids about the fairy tale characters individually and uses the story and characters to teach in several domains.

What I am going to do with each of the kids for learning centers we are going to help educate the kids using this fun theme. I believe that they will have fun with the different centers. My goal is for each of the learning centers and circle time, that they will take something away from school that day. For that lesson plan I will have the kid's art on the wall and when we are done with the theme we will have them take the art work home.

In our play centers we will have a dress up center with fairytale costumes so they can role play as a fairy tale character. We will have block center so they can build castles and for home center we will have the characters eat a nice dinner.

In summary, the lesson plan uses a fair tale theme in order to teach the children in language arts, science, math, and reading. I look forward to using this lesson plan in my classroom.
